EASY FEED TOOL

It's simple to use — with a push of a button the feeding tool dispenses 2-5 Betta pellets. Invert the bottle, put the tapered feeding tube into one of the access holes on the top of the Betta cups, then push the button once. Quickly feed your Betta fish the right amount of food!

Quickly feed Bettas the right amount of food

No need to remove cups from center to feed your fish

Proper feeding two to three times a week helps keep water clear and reduces the frequency of water changes

EASY WATER TOOL

Betta Water Tool is a pressure tank that is specifically designed to quickly fill and replace evaporated water in the cups in your Betta Center. The specially designed nozzle was designed to fit in the access holes in the lid of the Betta Cup. Keeping the Betta cups filled to their proper operating level will insure air pressure is regulated and will keep air running to all cups.
